

GEODETTIC TRANSFORMATIONS

(Programs Available From NGS)

NADCON:

- **Convert NAD27 to NAD83(86) & NAD83(86) to NAD27**
- **Convert NAD83(86) to NAD83(HARN) & NAD83(HARN) to NAD83**

VERTCON:

- **Convert NGVD29 to NAVD88 & NAVD88 to NGVD29**

GEOID96:

- **Model geoid heights based upon:**
 - **Ellipsoid height orthometric height differences**
 - **Underlying geoid model**
 - **Gravity data**

CORPSCON:

- **Packages NADCON & VERTCON into one convenient package which provides user options for input/output.**
- **"Must have" package with one exception - CORPSCON does not include HARN based conversions.**
